MAAZ SHAHEEN

FULL STACK DEVELOPER | Python • FastAPI/Django • React • PostgreSQL • AWS

Lahore, Pakistan | +92 334 1057295 | maazshaheen5566@gmail.com

Portfolio: maazshaheen.github.io | LinkedIn: linkedin.com/in/maaz-shaheen-772b061b8 | GitHub: github.com/MAAZSHAHEEN

PROFESSIONAL SUMMARY

Full Stack Developer with 1+ years of hands-on experience delivering production web applications and REST APIs across Python, FastAPI/Django, React, PostgreSQL, Docker, and AWS. Strong in secure backend architecture, database design, frontend integration, cloud deployment, and production troubleshooting. Comfortable taking features from requirement to release while keeping code maintainable, reliable, and easy to scale.

1+ YEARS EXPERIENCE • END-TO-END FULL-STACK DELIVERY • SECURE APIs • AWS / DOCKER DEPLOYMENTS • AI INTEGRATION

PROFESSIONAL EXPERIENCE

Full Stack Developer | AI Sarih Organics

Islamabad, Pakistan | 2024 - Present

- Build and maintain production web features across React frontends, Python/FastAPI/Django services, and PostgreSQL databases, owning work from implementation through deployment.
- Design REST APIs for customer and admin workflows with validation, structured error handling, authentication, authorization, and clean service boundaries.
- Develop reusable frontend components and connect UI flows to backend services with clear loading, validation, success, and failure states.
- Model relational data, write safe schema migrations, optimize queries, and maintain data integrity as product requirements evolve.
- Implement security-focused patterns including JWT/OAuth2 authentication, bcrypt password hashing, role-based access control, and API protection where required.
- Containerize applications with Docker and deploy to AWS EC2 behind Nginx; manage Linux services, environment configuration, and production releases.
- Investigate production issues across frontend, backend, database, and infrastructure layers; improve reliability with testing, logging, and regression fixes.
- Translate business requirements into technical tasks, collaborate on product decisions, use Git-based workflows, and deliver incremental improvements with maintainable code.

SELECTED ENGINEERING PROJECTS

AI-Powered Python Repair API | FastAPI • Google Gemini • AST • AWS EC2 • Nginx

- Engineered an AI-driven API that detects and repairs Python syntax errors using a self-healing agentic loop with up to three retry cycles.
- Added AST validation before file writes and a bulk folder scanner to avoid unnecessary AI calls; deployed as a 24/7 systemd service on AWS EC2 behind Nginx.

Ride-Sharing REST API | FastAPI • PostgreSQL • SQLAlchemy • Alembic • Docker

- Architected an intercity ride-sharing API with JWT authentication and role-based access for passenger, driver, and admin workflows.
- Used async PostgreSQL/SQLAlchemy, Alembic migrations, Docker Compose, AWS EC2, and Nginx to support safe production deployment and schema evolution.

Expense Tracker API | FastAPI • JWT • REST • AWS EC2

- Built a multi-user personal-finance REST API with CRUD operations, strict per-user data isolation, secure JWT authentication, and production deployment.

TECHNICAL SKILLS

Frontend: React, JavaScript, HTML5, CSS3
Backend & APIs: Python, FastAPI, Django, REST API Design, Pydantic, Async Programming, API Versioning
Data & Security: PostgreSQL, SQLAlchemy, Alembic, SQLite, JWT, OAuth2, bcrypt, RBAC, API Rate Limiting
Cloud & DevOps: AWS EC2, Docker, Docker Compose, Nginx, Uvicorn, Linux, Git/GitHub, CI/CD Basics
Testing & Tools: pytest, Postman, Black, Ruff, VS Code, Cursor, Google Gemini API

EDUCATION

Bachelor's in Computer Science Engineering | University of Engineering and Technology, Mardan | 2021 - 2025
